CORE SKILLS

AUTOMATION

Playwright Cypress Selenium TestCafe
QuickTest Pro

API TESTING

API Automation REST Assured Postman
Swagger Contract Testing SoapUI

AI-ASSISTED TESTING

ChatGPT GitHub Copilot Cursor
Prompt Engineering Test Case Generation
Requirement Analysis

FRAMEWORKS & TEST DESIGN

BDD JBehave SpecFlow TestNG
JUnit Maven Gradle

CI/CD & VERSION CONTROL

GitHub Actions Jenkins Git SVN

PERFORMANCE & OBSERVABILITY

K6 JMeter LoadRunner Datadog

TEST MANAGEMENT

Jira TestRail HP QC MTM TFS

LANGUAGES

Java JavaScript SQL XML VB Script

SECURITY

OWASP ZAP Qualys

Profile

Senior **Quality Engineering** professional with **15+ years** of experience leading test automation, quality strategy, and release confidence initiatives across SaaS, e-commerce, and enterprise platforms. Expert in **Playwright, Cypress, API testing, performance testing, CI/CD quality gates, observability, and AI-assisted testing**. Successfully led large-scale Cypress-to-Playwright migrations, introduced quality health monitoring frameworks, and enabled shift-left quality practices across cross-functional teams.

Currently leveraging AI-assisted testing techniques using ChatGPT, GitHub Copilot, and modern AI tooling to accelerate test design, exploratory testing, risk analysis, and quality engineering workflows.

Core Expertise: Playwright, Cypress, Selenium, API Automation, REST Assured, Postman, Contract Testing, CI/CD, GitHub Actions, Datadog, Quality Engineering, Test Strategy, Test Architecture, AI-Assisted Testing, Performance Testing, Shift-Left Testing, Agile Delivery.

Experience

Senior QA Automation Engineer

JUN 2022 — DEC 2025

FRONTIFY AG · REMOTE

- Led the organization-wide Cypress-to-Playwright migration as project manager — owning planning, estimation, prioritization, retrospectives, and risk assessment across multiple product teams.
- Automated 300+ regression scenarios using Playwright, reducing manual regression effort by ~60% and accelerating release cycles.
- Built 10+ Datadog quality dashboards correlating test outcomes with CPU, memory, API latency, and PHP process metrics — reducing root-cause analysis time and improving release observability.
- Integrated Cypress and Playwright automation into GitHub Actions pipelines, enabling automated quality gates across every release.
- Drove the move from Cypress Dashboard to TestRail, improving test management efficiency, traceability, and coverage visibility.
- Established Quality Health Monitor (QHM) workshops, exploratory testing sessions, and high-priority bug postmortems — embedding shift-left quality practices across cross-functional teams.
- Led quality initiatives and mentored QA engineers on automation strategy, test architecture, and AI-assisted testing workflows using ChatGPT and GitHub Copilot.
- Partnered with engineering managers and product leaders on release readiness, defining quality KPIs and health monitoring practices.

Professional Quality Engineer

DEC 2018 — APR 2022

MARKET LOGIC SOFTWARE AG · BERLIN

- Designed and maintained scalable automation frameworks using Selenium and JBehave supporting multiple product releases.
- Built API automation with Postman and contract testing with REST Assured, strengthening integration quality across microservices.
- Created backend performance tests with K6 and integrated them into delivery pipelines for continuous release confidence.
- Defined quality metrics and test coverage reporting, increasing release confidence and stakeholder visibility.
- Led quality initiatives across product teams and coached engineers on testing practices, agile planning, retrospectives, and release readiness.

Associate Quality Assurance Manager

OCT 2012 — DEC 2018

NAGARRO SOFTWARE PVT. LTD · INDIA

- Implemented automation-first testing practices across projects spanning automation, API, performance, security, and functional testing.
- Championed shift-left testing and early defect prevention, contributing to estimation, Agile test strategy, and acceptance criteria for new modules.
- Led automation adoption initiatives across distributed QA teams using SpecFlow, Selenium, TestNG, Postman, and JMeter.
- Mentored cross-functional engineers and standardized QA practices to broaden automation maturity and engineering excellence.
- Partnered with product and engineering stakeholders on release planning and quality strategy across multiple client engagements.

QUALITY ENGINEERING

Quality Strategy Test Architecture

Test Automation Framework Design

Shift-Left Testing Engineering Excellence

Release Quality Quality KPIs

EDUCATION

Bachelor of Technology

Computer Science / Information Technology
Apeejay College of Engineering

CERTIFICATIONS

Certified Scrum Master

Scrum Alliance

ISTQB Foundation Level

Int'l Software Testing Qualifications Board

WHAT DRIVES ME

- ▶ Building quality cultures where engineers own quality end-to-end.
- ▶ Exploring AI-assisted testing to accelerate test design and risk analysis.
- ▶ Mentoring QA engineers and championing shift-left engineering excellence.
- ▶ Turning quality data into actionable insights for release confidence.

Test Engineer

NOV 2009 — OCT 2012

INFOSYS LTD · INDIA

- Built Requirement Traceability Matrices (RTM) mapping every requirement to corresponding test cases, improving coverage visibility.
- Designed and reviewed test cases from requirement specifications using HP Quality Center.
- Performed functional, system, and UI testing; automated regression with QuickTest Professional.
- Executed performance testing with LoadRunner — scripting, load runs, and analysis reporting.
- Managed the defect lifecycle in QC and ran regression cycles on every build, ensuring release quality.

Key Achievements

- Led enterprise-wide Cypress-to-Playwright migration — owning planning, estimation, retrospectives, and risk, while contributing to framework architecture and automating 300+ scenarios.
- Introduced AI-assisted testing practices using ChatGPT, GitHub Copilot, and Cursor — improving test design velocity, requirement analysis, and exploratory testing quality.
- Built CI/CD quality gates in GitHub Actions, improving release confidence and reducing regression escapes to production.
- Established quality health monitoring using Datadog — designing 10+ dashboards correlating test results with system performance metrics.
- Mentored QA engineers across multiple product teams on automation strategy, test architecture, and shift-left practices.
- Drove TestRail adoption replacing Cypress Dashboard, improving test management efficiency and coverage visibility.
